

IMPORTANT - Ranking for International Laser Events

Virtually all the major Laser events have now changed to become "Allocated" events. Instead of the prospective competitors having to contact the Irish Laser Association to register their interest, the contact is now made direct with the **International** Laser Class Association. A full description of how this works will be found on www.laserireland.com under "Events and Forms". It is also available on the ILCA website (www.laserinternational.org) (the link can be found on the right-hand side of the front page of their site).

Applications must be made through ILCA by **14th March** for the following 2008 events:-

World Laser 4.7 Youth Championship, 22nd - 29th August, CROATIA, Trogir (5 males, 3 females)
European Laser Standard Senior Championship, 12th - 19th July, BELGIUM, Nieuwpoort (5 places)
European Laser Radial Womens Championship, 12th - 19th July, BELGIUM, Nieuwpoort (4 places)
European Laser Radial Mens Championship, 12th - 19th July, BELGIUM, Nieuwpoort (3 places)
European Laser Radial Youth Championship, 25th July - 1st August, FRANCE, Douarnenez (6 male, 3 female)

ALL PROSPECTIVE ENTRANTS

Please register your interest for the appropriate event on the ILCA website **NOW**. **If you do not apply now you will NOT be offered a place if one is available.**

Standard Rig

Ranking will be strictly based on the ILA Ranking Ladder but will include both the Munster and Ulster Championships 2008 as two of the five "Ranking" events.

Radial Rig

Ranking will be strictly based on the ILA Ranking Ladder but will include both the Munster and Ulster Championships 2008 as two of the five "Ranking" events.

4.7 Rig

Ranking will be based solely on the total of the points gained in both the Munster and Ulster Championships 2008. This is designed to allow those that are new into the fleet an opportunity to demonstrate their capabilities within the 4.7 Rig fleet.

NOTE

The European Laser Standard Youth Championship is an Open Event but competitors must be at least 17 years old but not 21 years old in 2008. It will be held in Douarnenez, FRANCE on the same dates as the European Laser Radial Youth Championship.
